ON HUMAN FLESH. Thousands of trais on human flesh has proved beyond a doubt that "Kendali's Spavin Cure" has sufficient strength to penetrate and virtue to cure the worst cases of rheumatism, corns, bunyons, frost-bites, or any bruise, cut or lameness which are not affected in the least by ordinary liniments. It does not blister but on the contrary removes all agreeness.

the contrary removes all soreness. KENDALL'S SPAVIN CURE WATERLOO, INDIANA, Sept. 7, 1881. WATERLOO, INDIANA, Sept. 7, 1881.

BOYER & CAMPERLL—Gentlemen: The bottle of Kendall's Spavin Cure I purchased of you has cured me of a very lane back, (after neing almost everything else) the relief was almost instant. I put only a very little on at a time and subbed it in well. I consider it the best liniment for man or horse extant. I would not do without it for ten times the amount it costs.

Yours truly, HIRAM LEIB.

KENDALL'S SPAVIN CURE Is sure in its effects, mild in its action, as it does not blister, yet it is penetrating and powerful to reach very deep scatted pain or to remove any bony growth or other enlargements, such as spayins, splints, curbs, callous, surains, awellings and any ismeness and all enlargements of the joints or limbs, or for rheumatism in man and for any purpose for which a liminent is used for man or beast. It is now known to be the best liniment for man ever used, acting mild and yet certain in its effects.

Send address for Illustrated Circular which we think gives positive proof of its virtues. No

OZONE! OZONE!

This Preservative is not a liquid, pickle, or any or the old and exploided processes, but is simply and purely OZONE, as produced and applied by an cultivity new process. OZONE is the antiseptic principle of every substance, and possesses the power to preserve animal and vegetable structures from decay.

There is Nothing on the Face of the Earth Liable to OZONE the New Preservative, will not Decay or Spoil which

The value of OZONE as a natural preserver has been known to our abler chemists for years, but, until now, no means of producing it in a practical, inexpensive, and simple manner have been discovered. Microscopic observations prove that decay is due to septic matter or minute germs, that develop and feed upon animal and vegetable structures. OZONE, applied by the Prentise method, seizes and destroys these germs at once, and thus preserves. At our offices in Cincinnatic can be seen almost every article that can be thought of, preserved by this process, and every visitor is welcome to come in, taste, smell, take away with him, and test in every way the merits of OZONE as a preservative. We will preserve, free of charge, any article that is brought or sent prepaid to us, and return it to the sender, for him to keep and test.
